# POINTS TO BE DISCUSSED

1- INTRODUCTION

2-OBJECTIVE

3-SCREENSHOTS

4-SPECIFICATIONS

5-S/W and H/W requirement

6-CONCLUSION

7-FUTURE ENHANCEMENT

# INTRODUCTION

- Portal is a web system that provides the function and features to authenticate and identify the users and provide them with easy, intuitive, personalized and user-customizable web-interface for facilitating access to information and services that are of primary relevance and interests to the users. Student management Portal is nothing but a portal which thinks students as the main target & collect all the information of the students to provide it to admin. This portal also provides so many useful services to students at a single place & through a single interface but in customized form.

# OBJECTIVE

- The main purpose of this system, is to reduce the consumption of time during maintaining the records of college. Separate divisions are providing to maintain the records of students. Our System also procure an easy way not only to automate all functionalities of a college, but also to procure full functional reports to top management of college with the finest of details about any phase of college.

In other words, our college portal has, following objectives:

- Simple database is maintained.
- Easy operations for the operator of the system. User interfaces are user accommodating and attractive; it takes very less time for the operator to use the system.
- The aim is to design a college website which implant update information of the college that should improve expertness of college record management.

# TECHNOLOGY USED

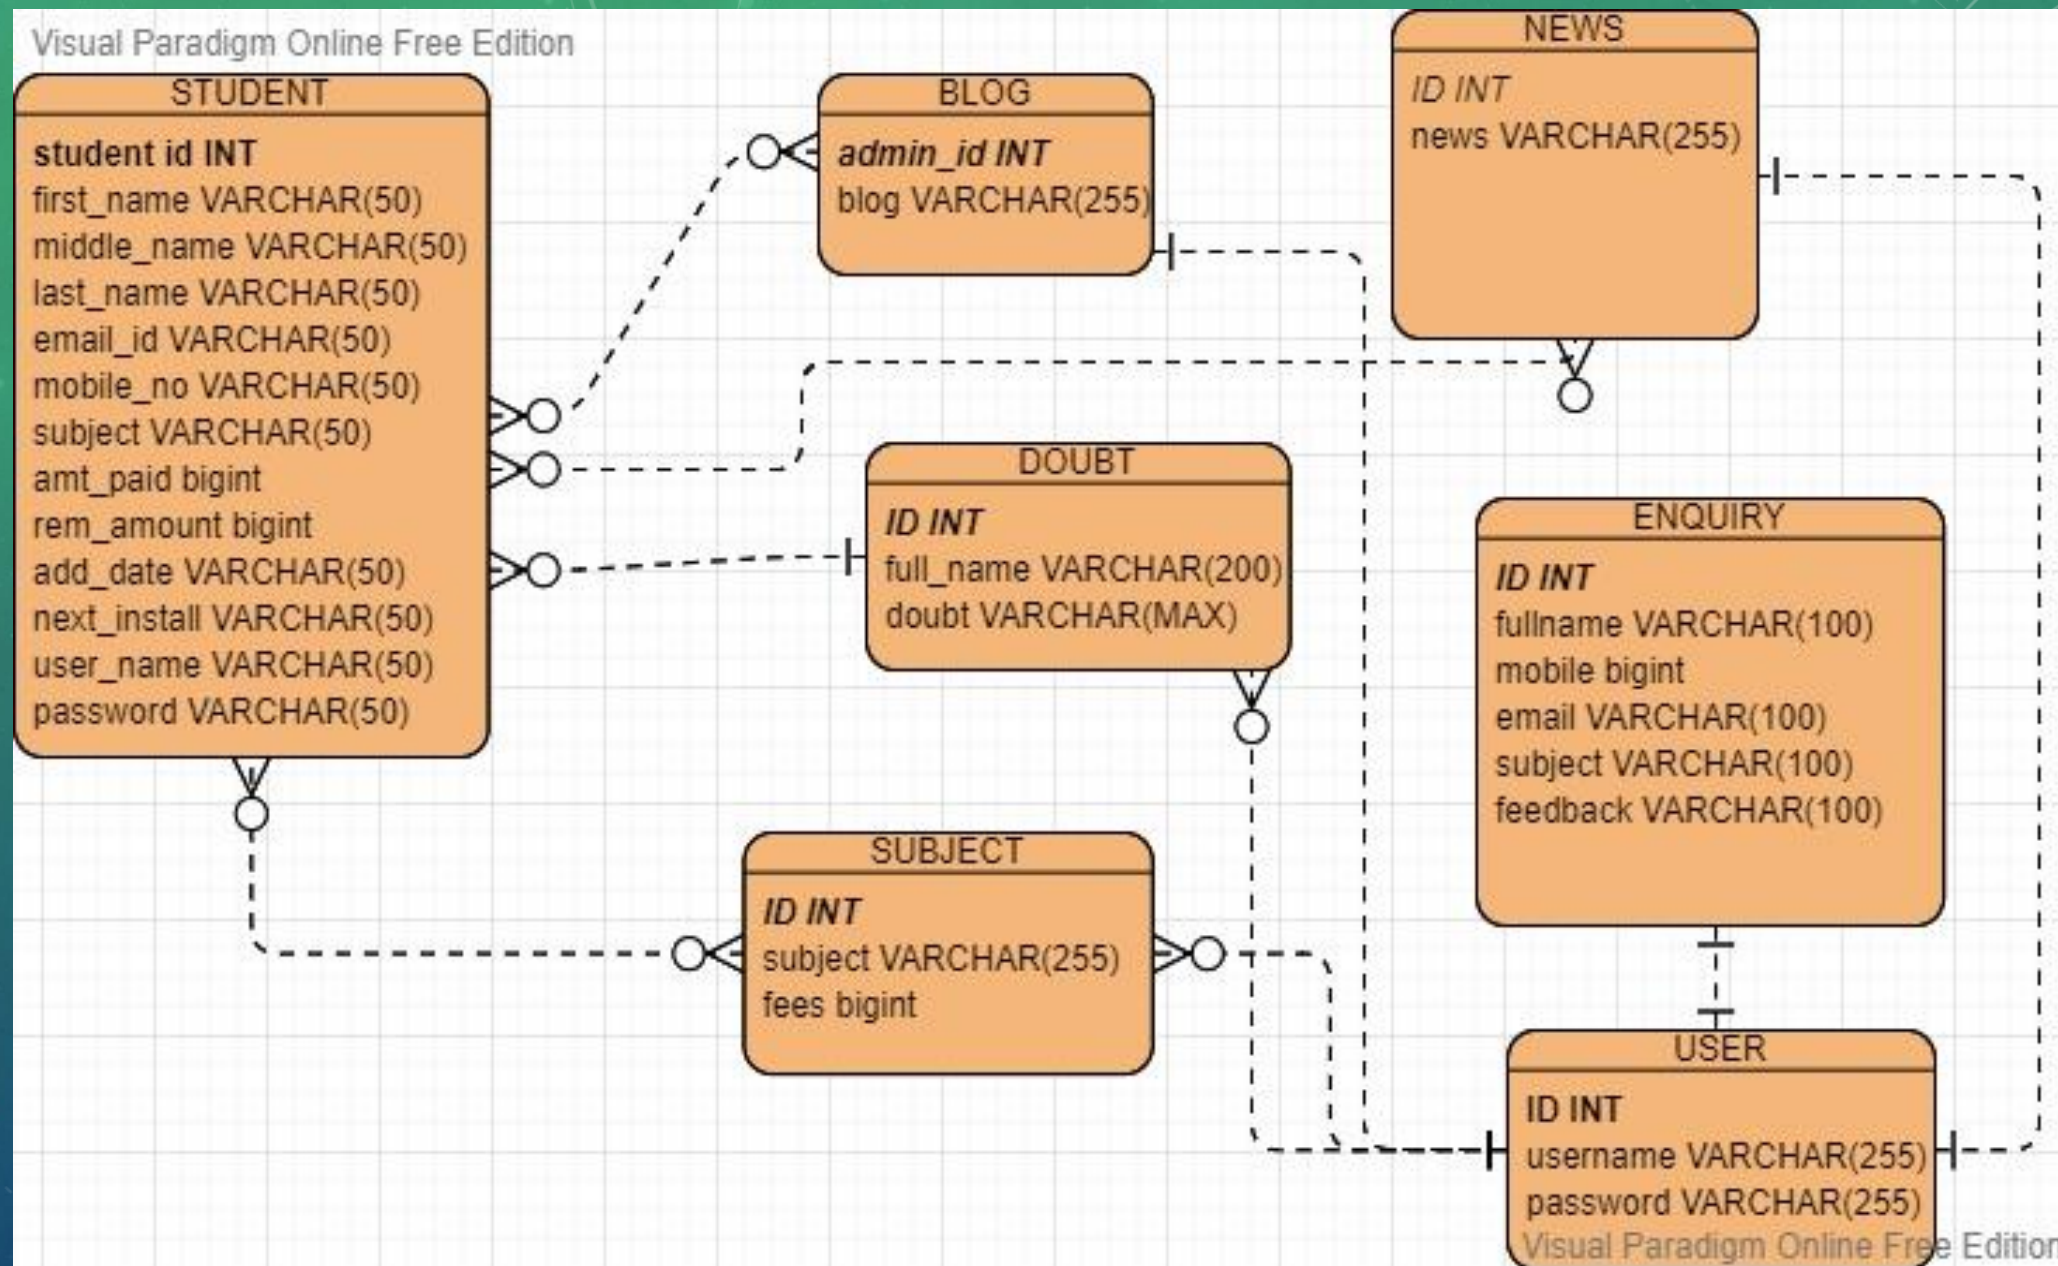

FRONTEND-HTML, CSS

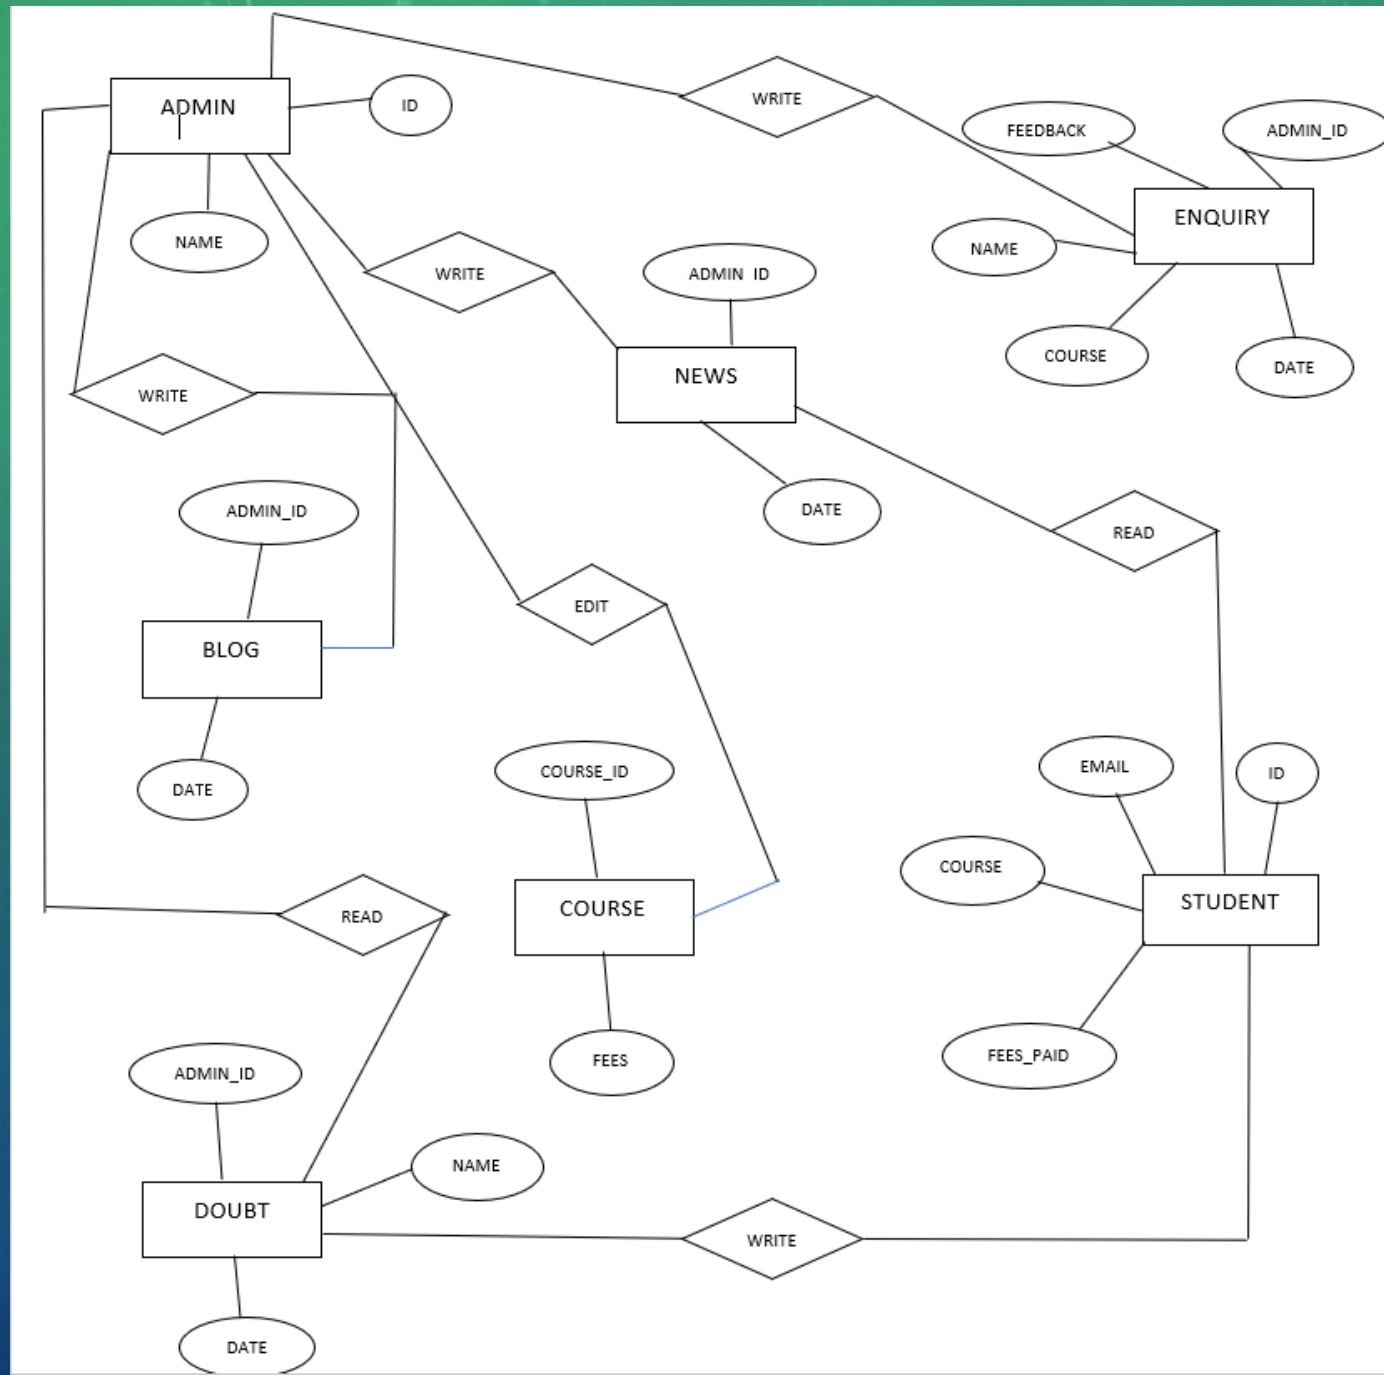

BACKEND-ASP.NET, SPRINGBOOT API

# SPECIFICATIONS

- The application will use JavaScript, jQuery and CSS as main web technologies. HTTP and FTP protocols are used as communication protocols. FTP is used to upload the web application in live domain and the client can access it via HTTP protocol. SMTP protocol is used for Email communication. Several types of validations make this web application a secured one and SQL Injections can also be prevented. Since Student's Online Portal is a web-based application, internet connection must be established. The Student's Online Portal will be used on PCs and will function via internet or intranet in any web browser

# S/W AND H/W REQUIREMENTS

- Server Side:

Processor: Intel® Xeon® processor 3500 series

HDD: Minimum 500GB Disk Space

RAM: Minimum 4GB

OS: Windows 10, Linux 6

Database: MySQL

- Client Side (minimum requirement):

Processor: Intel Dual Core

HDD: Minimum 80GB Disk Space

RAM: Minimum 2GB

OS: Windows 7, Linux

# CONCLUSION

- This project aid in automating the existing manual system. This is a paperless work. It can be monitored and guarded remotely. It cut down the man power required and provides accurate information. All years together huddled information can be saved and can be accessed at any time. For this reason, the data stored in the repository helps in taking decision by management. So, it is improved to have a Web Based system. All the stakeholders, faculty and authority can get the required information without delay. This system is crucial in the colleges and universities.

# FUTURE ENHANCEMENT

- This project can be enhanced further by adding payable additional courses, online feedback system, online payment facility for the members to reduce the extra work of the admin. The software is flexible enough to be modified and implemented as per future requirements. We have tried our Best to present this free and user–friendly website to Institutes.
